

Helping Companies Optimize IT Capabilities with Next Generation SOLUTIONS AND SERVICES

AdvizeX: A Trusted Advisor in Transforming Your Technology Infrastructure and Resources

AdvizeX has developed a unique vendor-agnostic assessment tool that can accurately benchmark the current state of your IT infrastructure and identify critical gaps in eight major technology zones. The Advizor™ tool snapshots and evaluates your current environment based on over 600 weighted characteristics.

IT organizations are poised for a major shift as virtualization and cloud computing continue their rapid adoption. Is your organization ready? The AdvizeX team of seasoned IT professionals and consultants can work with you to define, identify, and implement a next-generation technology migration path that's right for your company. Our work is based on the highest levels of certified professional expertise, best-of-breed technology solutions, and a unique patented assessment methodology, the Advizor™ tool.

A Comprehensive Approach to the Emerging Virtual Data Center

AdvizeX understands the many business and technical challenges that IT organizations face today as technology continues to evolve and complexity grows. Our consultants and technical experts have deep levels of expertise but are also cross-trained in each of the eight critical domains affecting the virtual data center: virtualization, platforms, networking, storage, applications, security, backup and recovery, and business continuity.

With an approach that moves beyond isolated departmental silos, our consultants can help you build a data center blueprint that takes all of these key areas into account. If you're looking to take advantage of leading-edge technologies and solutions, we can guide you through the complexities of emerging areas such as deduplication, unified storage, platforms as a service, advanced virtualization, BSM and CMDB management, and many more. If full-scale cloud computing is on your agenda, we can provide the expertise needed to implement an appropriate cloud strategy, whether private, public, or hybrid. In networking, AdvizeX provides LAN switching, WAN routing, WLAN, and unified communications solutions that

AdvizeX Provides Deep Expertise and Consulting in Today's Most Critical IT Arenas

Applications	Virtualization	Platforms	Storage
Networking	Business Continuity	Backup & Recovery	Security

With best-of-breed solutions and a knowledge base honed through years of real-world experience, AdvizeX can be a trusted partner, helping you chart a well-considered path towards the next-generation IT resources that will optimize your company's end-to-end business value.

AdvizeX Has Locations Near You

reduce complexity, optimize performance, and flatline operating costs. For line of business applications, we built our reputation on developing leading-edge ERP implementations—expertise which extends to all major application areas including Microsoft Exchange, SAP CRM, Oracle Database and E-Business Suite, and many others.

A Unique Assessment Methodology: The Advizor™ Tool

The AdvizeX approach is comprehensive and includes planning, implementation, and post-migration support, customized and tailored to address the specific needs of your computing environment. To assist in this process, AdvizeX has developed a unique vendor-agnostic assessment tool that can accurately benchmark the current state of your technology infrastructure and identify critical gaps in all eight technology zones. The Advizor™ tool snapshots and evaluates your current environment based on over 600 weighted characteristics, regularly refined and updated by a seasoned panel of IT experts. Built on a knowledge base of over 400 person-years of experience, the Advizor™ tool then provides the results in the form of objective and easily accessible formats including Effort Benefit Quadrants, SWOT analysis, and other trusted business strategies.

AdvizeX Solution Centers Showcase Fully Scorecarded End-to-End Solutions

Today's IT organizations require not just point products but layered solutions that are fully integrated across networks and up and down stacks and able to provide end-to-end business value. Our strategically located Solution Centers allow customers and prospects to view simulations of multi-vendor end-to-end solutions that are fully scorecarded so you can see how your planned implementation performs *before* it's deployed. IT managers can test drive planned implementations, while minimizing risk and saving valuable planning and preparation time. Representing a multi-million dollar corporate investment, these customer centers are an important resource for dealing with today's complex IT challenges and one more example of our comprehensive and holistic approach to IT assessment and implementation.

Using best-of-breed solutions from the most respected suppliers in the business and augmented by a knowledge base honed through years of real-world experience, AdvizeX can be a trusted partner, helping you chart a well-considered path towards the next-generation IT resources that will best support your company's goals. Whatever your needs may be, let our team of experts work with you to optimize the end-to-end business value of your current IT resources.

With over 35 years of corporate experience, we've helped clients optimize their IT budgets, rightsize technology resources and applications, and increase business agility. The result is a 98% customer loyalty rating and over 2,500 customers in all major vertical markets including manufacturing, healthcare, education, government, financial, and retail.
